

"We've optimized our costs by more than 30% and kept the same level of service for our end users"

The Client

Webzilla Apps Inc is a developer of VPN Apps. The business prides itself on being innovative and dynamic and is constantly growing. Its most popular app is 'Secure VPN- Fast & Free', which is highly ranked in several countries and has had over five million installs.

Webzilla Apps provide premium VPN services to end-users, and since May 2015, its apps have been downloaded more than eight million times.

The Challenge

Dmitry Koltsov, CEO at Webzilla Apps Inc., reported paying high prices and experiencing difficulties with IP allocation which was impacting on its business operations and growth.

Our Solution

We worked with Webzilla Apps Inc. to implement a number of low-cost products, including Proto Compute and Kronos Cloud, which enabled it to overcome the difficulties it faced when using other providers.

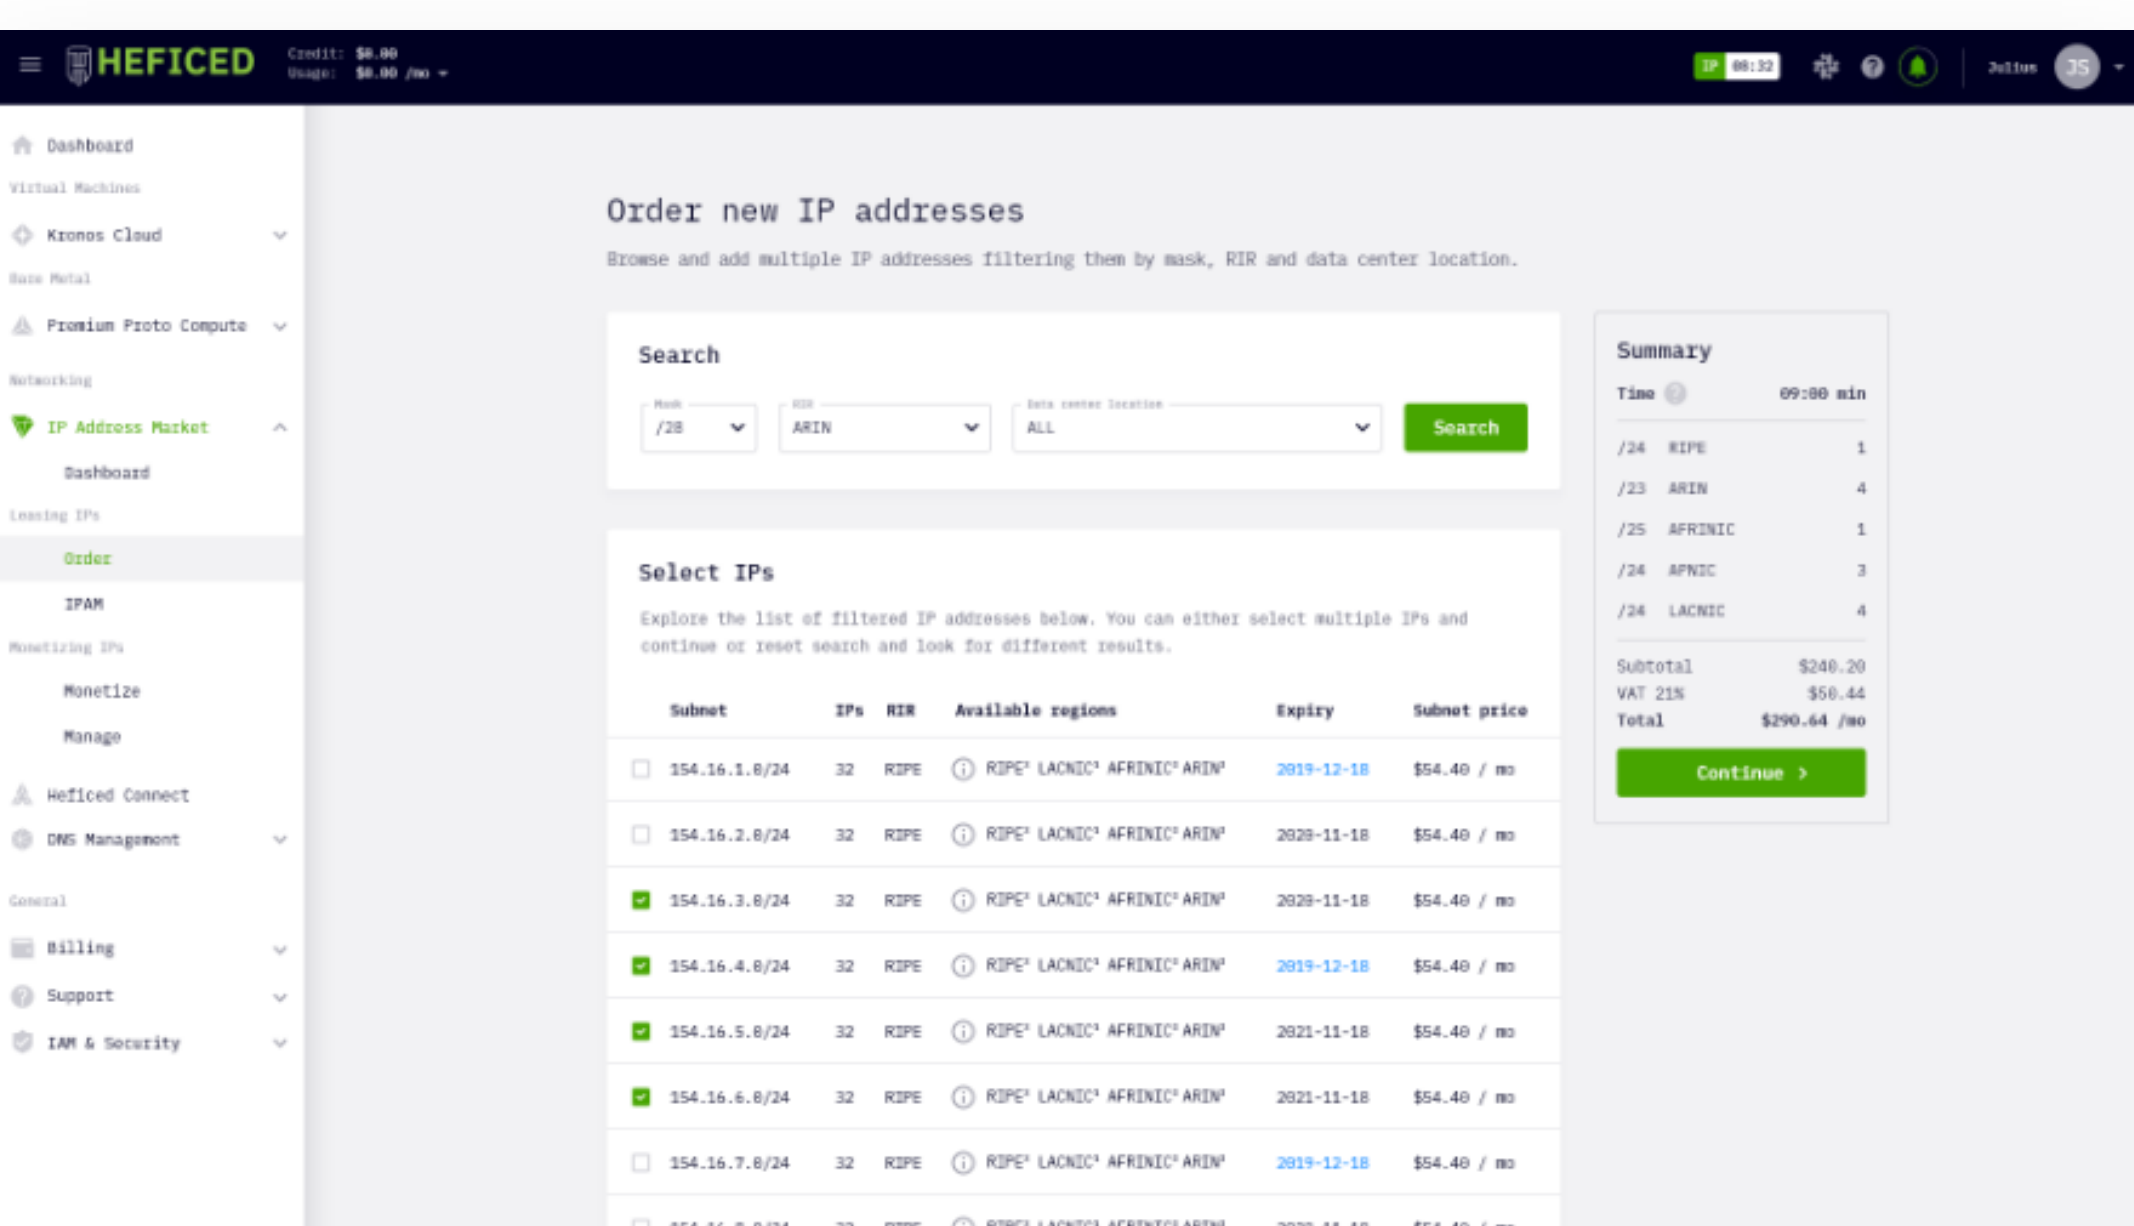

Proto Compute is a dedicated server that can accommodate changing business needs and enables the owner to modify existing services and applications, expand storage, and reinforce back-up systems. Our secure server infrastructure also means that websites are heavily guarded against malware, hacks, and other criminal activities.

You can learn more about Proto Compute [here](#).

Kronos Cloud hosts and manages workforce operating systems in the cloud, and its unified platform provides a full suite of applications for managing and nurturing the entire workforce, including payroll and human resources. In addition to a whole range of other benefits, Kronos Cloud also offers its users the facility to securely access applications over the web using mobile devices, tablets, laptops, and desktops.

You can learn more about Kronos Cloud [here](#).

We're pleased that Webzilla Apps Inc. found our [IP Address Market](#) and the [Heficed Connect](#) platform straight forward to access and easy to use.

Implementation

Webzilla Apps Inc. purchased Heficed servers for its proxies and VPNs because of the speed, stability, and security of the Heficed servers. It also purchased IP addresses to enable better hosting solutions.

Dmitry Koltsov reported finding it "very easy to purchase and configure services using Heficed Terminal," and as a result of using our services, Webzilla Apps Inc. was able to launch seven VPN servers in seven locations in "just a few days".

Result _

As a direct result of working with Heficed, Webzilla Apps Inc. experienced a number of benefits which have allowed the business to develop. It found that using our products meant that it was able to *“easily allocate IP space in realtime”* and *“optimized its costs by more than 30%”* while keeping *“the same level of service for end-users”*.

Webzilla Apps Inc. told us that it also experienced *“reduced costs”* and *“saved time”* by working with Heficed, which enabled it to invest more in the business and to focus on growth.

After experiencing very positive outcomes from working with us, Dmitry Koltsov urges other businesses to consider using Heficed, *“especially for global network infrastructure and/or in the case of significant demand for IP allocation”*.

The Future _

Webzilla Apps Inc. continues to grow, and we’re looking forward to continuing to support it in the future.

If, like Webzilla Apps Inc., you need additional IP addresses to grow your business, you can find out more about leasing IP addresses [here](#).

Kronos Cloud Pricing _
